

Press release – 26 February 2009

Sensornet announces South America agent Morken SA

Sensornet, provider of the world's most advanced monitoring solutions, is pleased to announce Morken SA as its Downstream Process agent for South America.

Morken SA specializes in providing equipment, materials and services, aimed to improve the transportation of gas, oil, petrochemicals and their derivatives. They offer a wide range of options for inspection, repair, maintenance or rehabilitation of pipelines, surface structures or subsurface pipelines and/or pumping plants, focusing on providing solutions for the early detection of corrosion.

Morken SA will represent Sensornet's digital pipeline monitoring solutions, including pipeline leak detection, and pipeline integrity monitoring technology. These solutions provide total integrity throughout the pipeline network, ensuring efficient, safe and secure operation.

Sensornet has developed a full range of tools and technologies to give operators an absolute understanding of the integrity of the infrastructure to curtail financial, logistical and operational risks. From Distributed Temperature Sensing (DTS), which is based on temperature measurements using distributed fibre optic sensing technology to Distributed Strain Sensor (DSS), which is used to detect any flexing in pipes that may be caused by process and poor installation, the equipment offers a robust, reliable and real-time detection solution to detect both liquid and gaseous leaks.

Jerry Worsley, VP Downstream Process, Sensornet said: "Sensornet recognize that South America has become a highly attractive area for E&P opportunities and is becoming a key area for accessing critical energy resources. Aligning ourselves with Morken SA will ensure that we have highly-trained local contacts who will be able to support operators as their infrastructure continues to expand."

Lothar Edelmuth, President Morken Argentina, CEO Bolivia & Peru, added: "Morken boasts more than 20 years experience pioneering in Argentina and neighbouring countries and like Sensornet, is a market leader in the development of state of the art technologies in oil and gas pipeline monitoring systems. Our representation of Sensornet in this region, not only articulates our combined strengths but also reinforces our unified commitment to delivering the most advanced solutions to our customer's challenges."

About SensorNet

Launched in 1998, SensorNet provides the world's most advanced asset monitoring solutions, using real-time distributed temperature and strain measuring systems.

SensorNet provides the complete Digital Monitoring package to the global oil and gas industry, and offers its own temporary and permanent DTS installation capability. The company is rapidly expanding and has offices based globally in Europe, North and South America, the Middle East and Asia.

SensorNet's award winning technology is supported by a highly qualified and experienced technical, operations and management team, which has provided multi-million dollar turnkey solutions to many of the world's leading blue-chip companies. From system engineering and design, to data interpretation services and post delivery support agreements, SensorNet is a full solution provider.

About Morken S.A.

The Morken Group was established over 30 years ago. Today Morken has offices in Argentina, Bolivia, Brazil, Peru, and also performs business in Chile, Venezuela, Colombia, Ecuador and Uruguay.

Morken specialises in providing equipment, materials and services, aimed to improve the transportation of gas, oil, petrochemicals and their derivatives. They offer a wide range of options for inspection, repair, maintenance or rehabilitation of pipelines,

surface structures or subsurface pipelines and/or pumping plants, focusing on providing solutions for the early detection of corrosion.
